SUMMARY

Detail-oriented second-year B.Tech CSE student with a strong foundation in the machine learning development lifecycle, including problem analysis, data preprocessing, model training, evaluation, and deployment fundamentals. Demonstrated problem-solving ability with 170+ DSA questions solved and consistent practice on platforms like LeetCode. Hands-on experience in building and training ML models, exploring real-world datasets, and collaborating effectively in team-based project environments. Eager to contribute as a Software Development Engineer or ML Intern by delivering clean, maintainable code, supporting development and debugging, and helping build impactful, scalable solutions.

EDUCATION

Poornima University , Jaipur, Rajasthan	2024–28
B.Tech in Computer Science (AI & ML)	CGPA: 8.3
Carmel Convent Sr. Sec. School , Neemuch, Madhya Pradesh	2023–24
Senior Secondary (CBSE)	91.3%
Carmel Convent Sr. Sec. School , Neemuch, Madhya Pradesh	2021–22
Secondary (CBSE)	84%

PROJECTS

- **ML Model Training Project (Disease Prediction / House Price Prediction) — Python, Scikit-learn, Pandas — 2025**
 - Trained and evaluated a machine learning model using a real-world dataset and implemented a complete preprocessing pipeline.
 - Performed feature engineering, data cleaning, and model selection to improve prediction accuracy.
 - Compared multiple algorithms (Logistic Regression / Random Forest / SVM) and validated results using appropriate metrics.
- **Terms & Conditions Summarizer — Python, NLP, Web Scraping, Django/Flask, REST API — 2025**
 - Built a tool that extracts Terms & Conditions text from a given URL and generates a concise summary of key clauses.
 - Improved readability by cleaning and processing text to highlight important points for faster understanding.

SKILLS

Programming Languages: Java, C++, C, Python, SQL

Web & Backend: Django, Django REST Framework, HTML, CSS, JavaScript

Machine Learning: NumPy, Pandas, Matplotlib, Scikit-learn, Data Preprocessing, Model Training, Model Evaluation

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Google Colab

Core Concepts: Data Structures & Algorithms, OOP, DBMS (Basics), Computer Networks (Basics)

CERTIFICATES

- [Machine Learning Supervised and Unsupervised \(Coursera\)](#) 2024–25
- [Deep Learning \(Neural Network\) \(Coursera\)](#) 2024–25
- [Accelerating SAS Code on the SAS Viya Platform](#) 2024–25
