

JEETAM SINGH YADAV

+91 9425361458 | jeetamtech@gmail.com | Jaipur, India

[LinkedIn: in/jeetamsinghyadav](#) | [GitHub: /jeetam1](#) | [LeetCode: /u/jeetam](#)

B.Tech CSE (AI & ML) student passionate about Machine Learning and AI, with hands-on experience building ML projects and experience in Full-Stack React development. Solved 170+ DSA problems on LeetCode.

EDUCATION

Poornima University, Jaipur, Rajasthan

Aug 2024 - May 2028

B.Tech in Computer Science (AI & ML) | CGPA: 8.1 / 10

Carmel Convent Sr. Sec. School, Neemuch, MP

2023 - 2024

Senior Secondary (CBSE) | 91.3%

Carmel Convent Sr. Sec. School, Neemuch, MP

2021 - 2022

Secondary (CBSE) | 84%

EXPERIENCE

Frontend Developer — Freelance

May 2026 - Jun 2026

Client: Shorya Mahanot | React, JavaScript, HTML, CSS | [GitHub](#) | [Live Site](#)

- Designed and developed a responsive portfolio website using React, JavaScript, HTML, and CSS.
- Built reusable UI components, implemented modern animations, and optimized the website for performance and mobile responsiveness.
- Collaborated with the client to refine requirements, incorporated feedback, and delivered the completed website on schedule.

PROJECTS

Claify – Terms & Conditions Summarizer

June 2026 - July 2026

Python, Django, NLP, REST API | [GitHub](#) | [Live Site](#)

- Developing an NLP-based application that extracts and summarizes Terms & Conditions from website URLs, highlighting key clauses, privacy policies, user obligations, and potential risks.
- Building a Django REST API for automated text extraction, preprocessing, and AI-generated summaries to reduce manual legal document review time.

PrivacyShield AI

March 2026 - May 2026

Python, FastAPI, React, NLP | [GitHub](#) | [Live Site](#) (In Development)

- Developed an AI-powered privacy protection platform that automatically detects and masks Personally Identifiable Information (PII), including names, phone numbers, email addresses, and Aadhaar numbers, before data is processed or stored.
- Built a FastAPI backend and React frontend, leveraging NLP techniques and secure data processing pipelines to support privacy-preserving AI applications and compliance-focused workflows.

Machine Learning Prediction Models

Sep 2025 - Dec 2025

Python, Scikit-learn, Pandas, NumPy, Matplotlib | [GitHub](#) | [Live Site](#)

- Built end-to-end machine learning models for Disease Prediction (classification) and House Price Prediction (regression), including data preprocessing, feature engineering, model training, and evaluation.
- Compared Logistic Regression, Random Forest, Decision Tree, and Support Vector Machine models using cross-validation and performance metrics such as Accuracy, Precision, Recall, F1-Score, RMSE, and R^2 to identify the best-performing model.

SKILLS

Languages: Python, Java, C++, JavaScript, SQL, C

Web & Frontend: React, Django, Django REST Framework, HTML, CSS

Machine Learning: Scikit-learn, NumPy, Pandas, Matplotlib, Feature Engineering, Model Training & Evaluation

Tools: Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Antigravity IDE

Core CS: Data Structures & Algorithms (170+ LeetCode), Object-Oriented Programming, DBMS, Computer Networks

CERTIFICATIONS

[Machine Learning: Supervised & Unsupervised — Coursera](#)

2025 – 26

[Deep Learning & Neural Networks — Coursera](#)

2026 – 27

[SAS Certified Specialist: Machine Learning Using SAS Viya](#)

2026 – 27
